

Standing Requirements

Program Mission Statement

The goal of the Master of Science in Security and Intelligence Studies (MSSIS) is to produce graduates who are qualified to enter the intelligence, aviation, military, homeland defense and corporate security communities, either as entry-level career professionals or as mid-level managers and analysts. For many currently working in these communities, the Master's degree will be seen as a qualification for promotion in the middle and even upper levels of management and command. In order to achieve this goal, the MSSIS must be recognized as one of the premier graduate degree programs in Security and Intelligence Studies, as indeed the undergraduate GSIS degree already is.

Participating Area: PC_MS Security & Intelligence Studies

ERAU University Mission Statement

Embry-Riddle Aeronautical University is the world leader in aviation and aerospace higher education. Our mission is to teach the science, practice and business of aviation and aerospace, preparing students for productive careers and leadership roles in business, government agencies and the military. Embry-Riddle's reputation as a leader in aviation and aerospace higher education is grounded in its aviation roots dating back to 1926.

(REQUIRED) Program Alignment to University Mission

Program Alignment to University Mission

Select all that apply.

Our mission is to:

- 2. Prepare students for productive careers
- 3. Prepare students for leadership roles in business, government agencies, or military
